

## Stoebich Fire & Smoke Curtain E

The economical textile fire protection closure  
with the highest level of standardisation

### Product Description

textile fire protection curtain

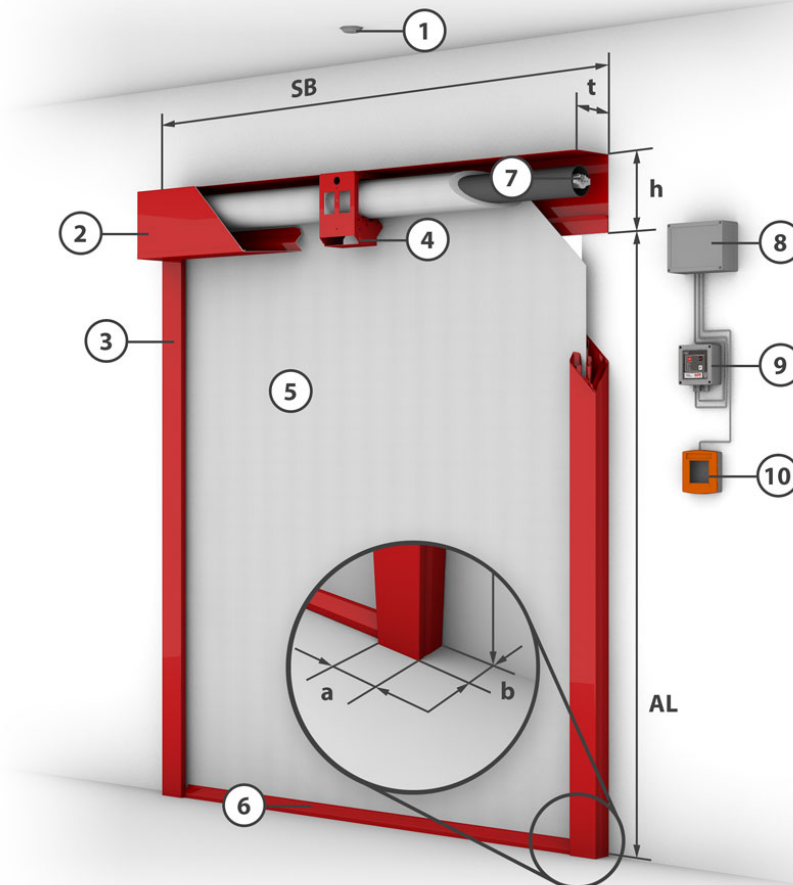

- High standardization and thus economic partitioning system up to maximum widths of 19.7' and a roll-off length of up to 26.2', or a width of up to 23.0' and a roll-off length of up to 5m as standard with "Gravigen" drive system.
- Close without external energy, no fire-resistant cables necessary
- High number of cycles of the motors of 10,000 cycles
- Various protection goals achievable through different types of fabric. Large fire curtain systems at least class C 1
- Optional: safety contact strip, optional spring-loaded bottom bar

<b>construction type</b>	textile fire protection curtain	<b>closing direction</b>	from top to bottom
<b>fire resistant</b>	90 minutes fire rating according to UL 10D, 20 minutes fire rating according to UL 10B, UL 10C, NFPA 252	<b>proof</b>	UB III/B-06-005 • 3102/717/07 • UB 3.1/09-021 • UB III/B-08-012 • UB III/B-08-016
<b>fabric</b>	Stoebich Fire & Smoke Fabric H • Fire & Smoke Fabric E	<b>closing cycle</b>	10,000 cycles (drive unit)
<b>fire load free zone</b>	Meet backface temperature 250°F with sprinkler as compensation		

## Constructive structure (system drawing)

Fabric	System width (SB)	Unrolled length (AL)	t	h
Stoebich Fire & Smoke Fabric E	≥ 3.6' - ≤ 9.8'	≤ 9.8'	7.87"	8.66"
Stoebich Fire & Smoke Fabric H	≥ 3.6' - ≤ 9.8'	≤ 9.8'	7.87"	8.66"

(Special sizes on request - Technically possible up to a width of 23.0' (Stoebich Fire & Smoke Fabric E) or 19.7' (Stoebich Fire & Smoke Fabric H))

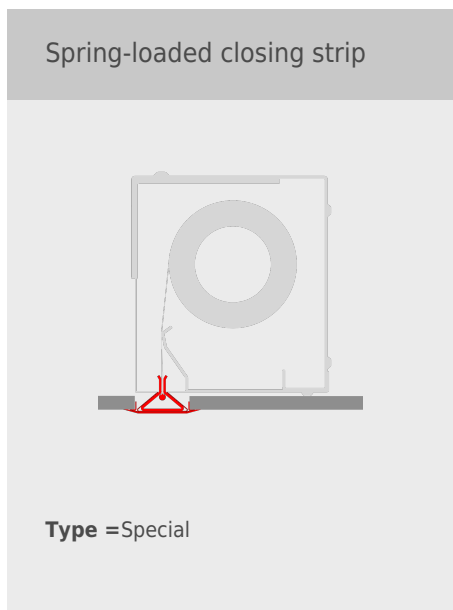

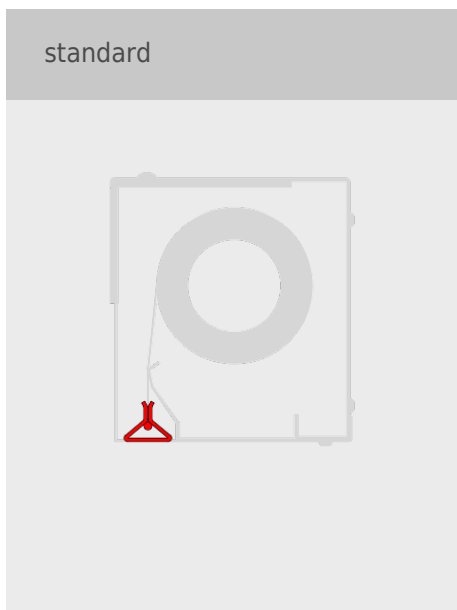

- 1** = Smoke detector    **2** = Casing    **3** = Side guide    **4** = Fixing bracket    **5** = Fabric    **6** = Closing element    **7** = Tubular motor  
**8** = Control module    **9** = Control with operating unit    **10** = Manual release
