

Stoebich Smoke Curtain X

The passable smoke barrier, but still ground-closing

Product Description

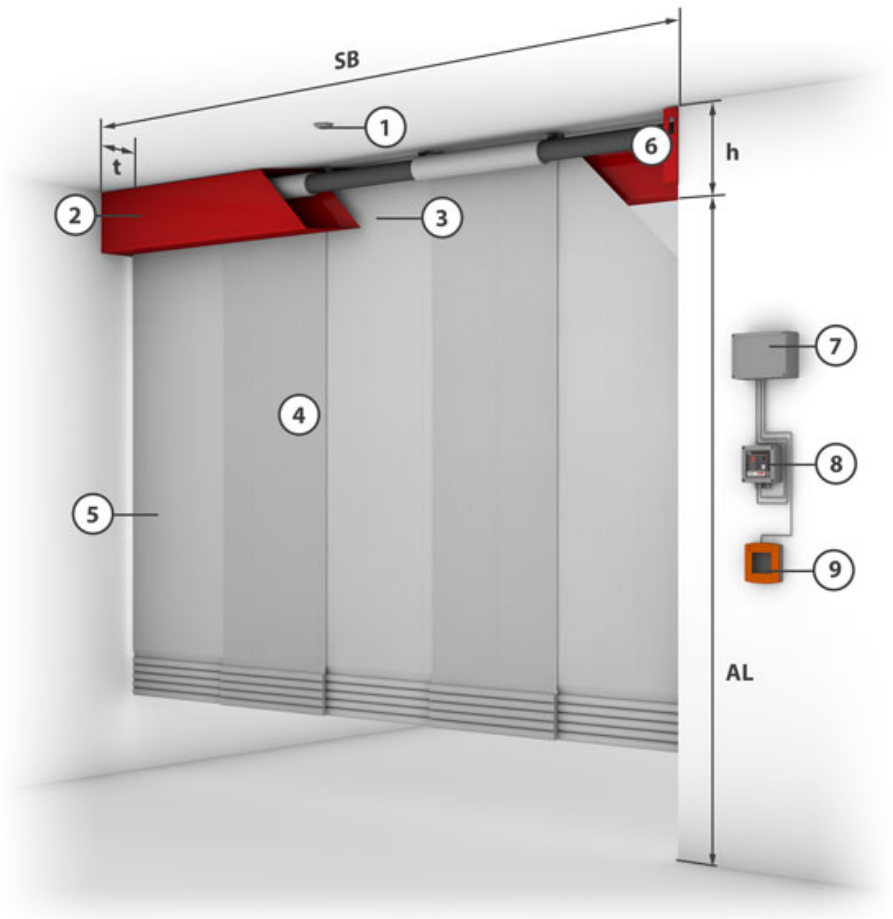

The passable and floor-closing smoke curtain

Stripecoil is the optimum smoke protection for personal passage areas and in escape routes - designed for the temperature classes D = 1,112°F (for 120 min) and DH (ETK curve, for 30 min). Even at a width of 118.11", the passage will allow around 200 persons (even with strollers and wheelchairs) to to pass per minute. The translucent fabric of the curtain ensures optimum light and visions conditions in passage areas. A soft and yielding closing edge also helps to minimise the risk of injury. The smoke curtain closes without any external energy with a 'Gravigen' drive motor.

construction type	textile smoke curtain
fabric	Stoebich Fire & Smoke Fabric M
proof	Z - 56. 429 - 916
closing direction	from top to bottom
feasible size	Up to 49.2 ft. wide or 11.5 ft. drop length (system limit)
classifications according to DIN EN 12101-1	Klassifizierung nach DIN EN 12101-1

Constructive structure (Two winding shafts)
